# FOUNDER STORY

---

Eran Windman, a plant biologist, is the creator and founder of Talia Skincare. His vision was to create sustainable and effective skincare products that prioritize visible results while maintaining a healthy experience.

Windman's deep connection to nature dates back to his childhood, surrounded by vineyards, orchards, and fruit trees. His fascination with plants, their biology, and their potential uses only grew with time.

Taking his passion to the next level, Windman pursued plant sciences in university, delving into the study of nature and exploring the health benefits that plants could offer.

As he became increasingly aware of the excessive use of chemicals in our daily lives, Windman recognized the superiority of natural alternatives, which provide cleaner and healthier outcomes. Driven by this realization, he entered the cosmetics industry and established Talia, aiming to positively impact people's well-being.

In fact, the first cream he ever created was for his niece, Talia. This personal touch reflects his dedication to producing skincare products that truly care for people.

“ I made a conscious decision to create skincare products that I feel safe giving to my loved ones, knowing that every drop used is pure, safe, and highly effective ”

## SELECTIVE TECHNOLOGIES TO DELIVER RESULTS

At the core of our approach, Talia's unique anti-aging bio-complexes are meticulously crafted to harness the full potential of natural ingredients, effectively reducing the visible signs of aging and promoting a youthful, radiant appearance.

It all begins with carefully selecting therapeutic natural elements for their specific benefits. Our dedicated team then conducts extensive research to uncover the optimal combination of these potent, pure ingredients.

As a result of this ongoing research, our Bio-complexes continuously evolve, integrating cutting-edge technologies like:

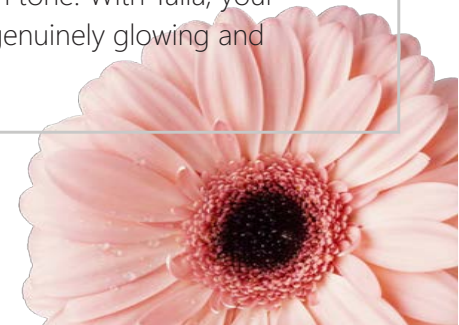

Hydrolyzed Hyaluronic Acid, which boasts a smaller molecular size for deeper penetration, a highly active form of Vitamin C (Ascorbyl Tetraisopalmitate) and clinically proven amino acids and peptides technologies, all working together to ensure rapid and long-lasting results.

At Talia, we're committed to bringing you the most effective anti-aging solutions through the power of science and nature.

## UNIQUE BOTANICAL BLENDS

# EXCEPTIONAL NATURAL SURROUNDING

---

The Dead Sea is a part of the natural surroundings. Throughout history, people have sought the healing properties of the Dead Sea to rejuvenate their skin.

We have thoughtfully integrated two of its most powerful natural elements into our products.

The first is its unique mineral composition, boasting over 21 essential minerals like Magnesium, Calcium, Silica, Sodium, Potassium, and more.

The second is the Dunaliella Salina Algae, hailing from the Dead Sea and renowned as one of the world's most potent naturally-derived antioxidants. This incredible alga is dedicated to combatting environmental aggressors and the damage caused by free radicals, ensuring your skin receives the utmost care and protection.
