Data Monetization and New Revenue Streams

The screenshot shows the Tesla stock overview page in English. It includes a header with the Tesla logo and a price chart. The main content area is divided into several sections: 'Company Stock Overview' with a list of links for company events and fundamentals; 'Fundamental Rating Breakdown' showing various financial metrics; 'Fundamental Strengths & Weaknesses' with a bar chart; 'Corporate Events' with a calendar view; and 'Company Overview' with key financial data like market cap and P/E ratio. A 'Recommendation' box at the top right suggests a 'Buy'.

The screenshot shows the Signature Bank stock overview page in Chinese. It features a header with the bank's name and a price chart. The main content area includes a 'Signature Bank 摘要' (Summary) section with a brief overview of the company's performance. Below this is a '基本财务指标' (Basic Financial Indicators) section with a bar chart. A '公司事件' (Company Events) section is also visible. A 'Recommendation' box at the top right suggests a 'Buy'.

The screenshot shows the Palantir Technologies Inc stock overview page in Arabic. It features a header with the company name and a price chart. The main content area includes a 'التاريخ التسليم الشركة' (Company Delivery History) section with a bar chart. Below this is a 'التحليل التقييمي الأساسي' (Basic Valuation Analysis) section with a bar chart. A 'التحليل التقييمي الأساسي' (Basic Valuation Analysis) section is also visible. A 'Recommendation' box at the top right suggests a 'Buy'.

# Why Japan?

High turnover stock market

Most local equities has no coverage

Big population

Low English proficiency

Uphill equity market

Leader in innovation adaption

# Appendices

# How we do this?

# Stock Analysis

Each parameter is modelled against historical and recent performance

Momentum & Rate of Change is calculated for each parameter

Proprietary distribution and Standard Deviations are calculated for each parameter relative to their peer group

Algorithms identify the most statistically significant parameters to predict stock performance

Resulting data is analysed using Stochastic Methodology on Historical performance

ML techniques are applied for probability assessment and final grading

Stock is ranked reflecting their likelihood of overperforming their peer group
