Why ActiveFence

Abuse is agile - and so are we.

Armed with a diverse team of linguistic and subject-matter experts, we monitor **over 10 million sources of online activity from across the clear, deep, and dark web**, tracking bad actors' chatter and understanding their evolving techniques.

Robust infrastructure for proactive Trust & Safety teams

ActiveFence merges unparalleled human expertise and continuously updated AI technology, to yield actionable insights at scale.

Intelligence-Led Insights

- Access to **>10M** clear, deep and dark web sources of abuse
- Deep understanding of evolving threat actor TTPs & adversarial mindset

AI-Enabled Scale

- Analyzing **>750M daily signals**
- Our teams of developers and data scientists apply machine learning techniques and mobilize automation

Subject-Matter Expertise

- Academics and harm area experts
- Elite military-trained OSINT analysts
- Security researchers and technical teams

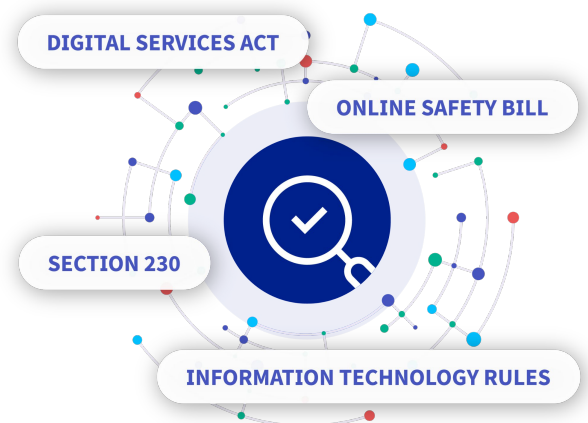

Socio-Political Context

- Linguists & cultural experts across the globe
- Monitoring harm in **>100 languages**
- Tracking geopolitical developments

Keeping platforms compliant

Along with global economic and political changes, the regulatory landscape is rapidly evolving. The Trust & Safety space is making headlines, and faces increased legal scrutiny in countries all around the world.

ActiveFence provides platforms with comprehensive tools for staying compliant, maintaining business continuity, while reducing costs.
