What powers Sonovia

Sonovia is solving the textile industry's most acute problem - *the massive pollution caused by outdated dyeing & finishing manufacturing practices*. Using **ultrasonic technology**, we are on our path to leave the most significant mark towards a green-textile industry.

Harnessing the power of sound

Mastering the use of ultrasonic cavitation jet-streams for sustainable dyeing and finishing of yarns and fabrics substrate.

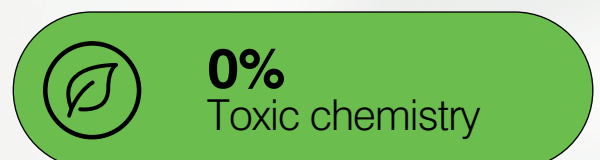

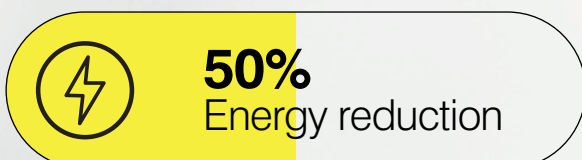

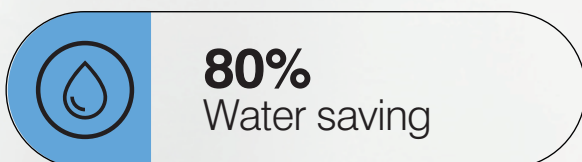

Business model

Sonovia is a full solution provider, of both the proprietary ultrasonic machinery and chemistry, along with best-in-class technical support.

A REVOLUTION

Applicable to all fiber types and easy implementation

Our partnerships

SONOVIA

PURE
DENIM

Supported by
K E R I N G

A leading innovative Italian elite brand's denim fabric manufacturer first to adopt Sonovia's revolutionary dyeing technology. Pure Denim and Sonovia are conducting a pilot for Kering, a leading luxury brands corporate aspiring to introduce the first ever made eco-friendly denim.

DELTA GALIL
INDUSTRIES LTD.

Global leader in the intimates and activewear industry, that foresees the next-generation products implementing Sonovia's innovative technology, providing exceptional long lasting anti-odor performance to their world wide customers.
