

## Automate Data Capturing Through Speech

aiOla is a novel speech-powered AI technology that's helping businesses to efficiently complete existing processes, save time, work smarter and collaborate effectively.

aiOla's robust solution supports over 100 languages, works in any acoustic environment, and understands all accents, so teams across global borders can connect data, gain insights, and identify trends to streamline workflows and enable process optimization.

## Why aiOla?

aiOla is the first-ever patented speech technology to successfully combine natural language understanding (NLU) with automatic speech recognition (ASR) to transform speech into structured data, automating workflows across any industry.

### We enable businesses to:

- Understand industry-specific jargon and vocabulary
- Accurately capture speech in any acoustic environment
- Save operational time by eliminating manual, error-prone processes
- Compliment human intelligence, enabling your team to speak through workflows, increasing productivity
- Maximize safety as workers get to keep their eyes on equipment
- Capture otherwise lost data, gain insights, trend spotting, and analytics, enabling cross-team collaboration
- Integrate with any existing CRM, ERP system, or cloud platform without disrupting your existing workflow
- Onboard quickly with little to no learning curve and an easy-to-use platform
- Enhance and augment existing processes without any disruptive changes

## aiOla's Impact: Do More With Less

**30%**

increase in production uptime

**45%**

decrease in operation time

**90%**

reduction of manual processes

Ready to Speak Productivity into Action?
