THE ACTELIS QUALITY NETWORK PRODUCTS

- Wide range of hybrid L2 & L3 network devices, copper, coax and fiber
- 19" aggregation units, ½ 19" Ethernet Access Devices, DIN rail Ethernet Access Devices
- Gbps over copper and fiber
- G.hn, G.FAST, VDSL, G.SHDSL
- Advanced Traffic Management & QoS. CE 2.0 certified
- Compact, environmentally hardened, cost effective

Expanding Fiber Switches Portfolio

DINRAIL

New GL5000 (22)

Existing ML500D (2 +)

Existing ML600D – Hybrid (10)

New GL6000 (21)

Existing ML500x (3)

Existing ML600x – Hybrid (13)

Rack mounted

A few examples

GL5010 Series

Product Name	High Level Description
GL5010 Series Common Features	<u>10-12 Port Hardened Industrial Managed Ethernet Switch. 1G Uplinks.</u> <u>Interfaces:</u> SFP/SFP+ 2x 100/1000F(x); 8x 100/1000BT <u>Extended Temperature :</u> -40°C ~ 75°C (-40°F ~ 167°F)* <u>Redundant Power Inputs</u>
GL5010-8J2F	10 ports L2 switch (as listed above)
GL5010-8J4F	12 port L2 switch - Additional 2x 100/1000F(x)
GL5010-10J2F	12 port L2 switch - Additional 2x 100/1000BT

GL5080X Series

Product Name	High Level Description
GL5080X Series Common Features	<u>Hardened Industrial Managed Ethernet Switch. DIN RAIL 10G Uplinks.</u> <u>Common Interfaces:</u> SFP/SFP+ 12x 1/10G; 4x 100/1000BT <u>Extended Temperature :</u> -40°C ~ 75°C (-40°F ~ 167°F)* <u>Redundant Power Inputs:</u> 12-48VDC
GL5080XR-4J12F	16-port L3 switch (as listed above)

(* For 10G SFP+: -40 ~ 60°C (-40°F ~ -140°F)

GL6010X

Product Name	High Level Description
GL6010X Series Common Features	<u>28-Port Hardened Industrial Managed Ethernet Switch. 10G Uplinks.</u> <u>Interfaces:</u> SFP/SFP+ 4x 1/10G + 24x 100/1000F(x) <u>Extended Temperature :</u> -40°C ~ 75°C (-40°F ~ 167°F)* <u>Power Over Ethernet:</u> 24 x IEEE 802.3at PoE <u>Redundant Power Inputs</u>
GL6010X-24J4F-P-DC	Power Inputs: 2x 48~57VDC, Robust Isolation
GL6010X-24J4F-P-AC	Power Inputs: 2x 90~264VAC
GL6010X-24J4F-P-AD	Power Inputs: 1x 90~264VAC, + 1x 48~57VDC
GL6010XR-24J4F-P-DC	L3 Switch, Power Inputs: 2x 48~57VDC Robust Isolation
GL6010XR-24J4F-P-AC	L3 Switch; Power Inputs: 2x 90~264VAC
GL6010XR-24J4F-P-AD	L3 Switch, Power Inputs: - 1x 90~264VAC, + 1x 48~57VDC

(*) For 10G SFP+: -40 ~ 60°C (-40°F ~ 140°F)

GL6031

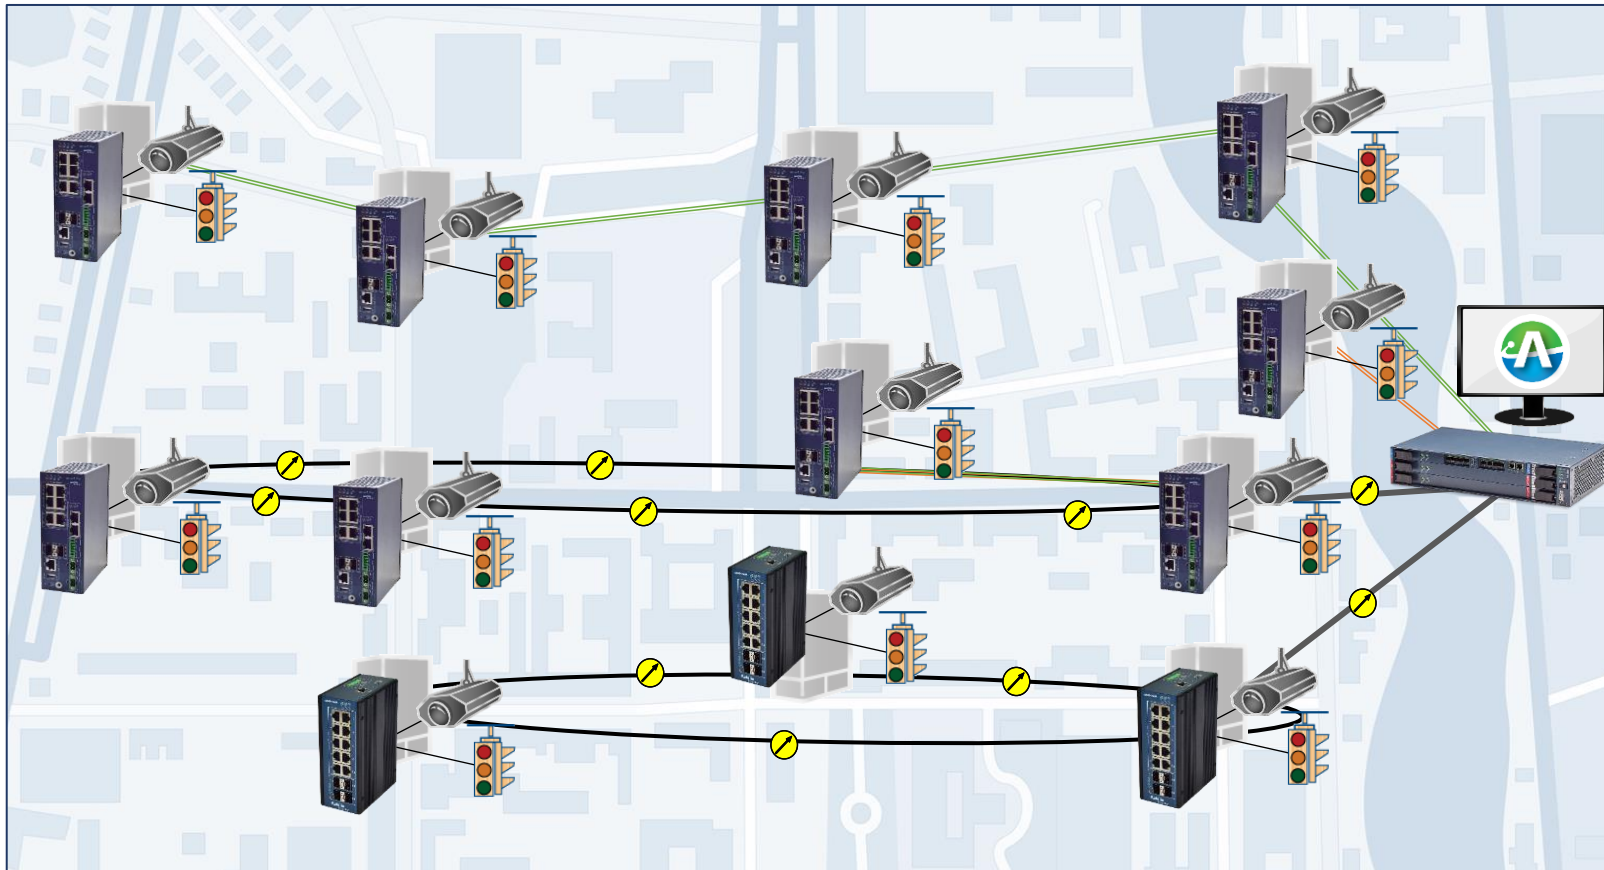

Product Name	High Level Description
GL6031 Series Common Features	<u>28-Port Hardened Industrial Managed Ethernet Switch.</u> <u>Interfaces:</u> 24x 100/1000BT <u>Extended Temperature :</u> -40°C ~ 75°C (-40°F ~ 167°F)* <u>Redundant Power Inputs</u>
GL6031-16J12F	<u>Interfaces:</u> Additional 4x 100/1000F(x) , 8x COMBO 1G
GL6031-16J12FC-DC	Power Inputs: 2x 12~48VDC Robust Isolation
GL6031-16J12FC-AC	Power Inputs: 2x 90~264VAC
GL6031-16J12FC-AD	Power Inputs: - 1x 90~264VAC, + 1x 12~48VDC

(*) For 10G SFP+: -40 ~ 60°C (-40°F ~-140°F)

TYPICAL SMART CITIES TRAFFIC USE CASE

Drop & Continue, Ring, or Linear Topologies

Hybrid Fiber-Copper traffic management network

Aggregation Switch (ML2300)

Hybrid Fiber-Copper Switch
(ML684D)

Fiber Switch
(ML5114D)

EMS Remote
Monitoring/Provisioning

MODERNIZATION FOR SAFETY & EFFICIENCY

City of San Jose, CA

Challenge: High speed connectivity to support IoT device expansion

- Only 15% of city has fiber at the intersection
- Population is growing and more cameras and sensors are needed for better traffic management

Solution: Actelis ML684 (Hybrid) and ML5114 (Fiber)

- Supports sensors and cameras in a variety of topologies
- Flexible network management, enabling traffic management and real-time adjustment
- Cyber-hardened solution
- Option for power over data lines

Savings of
80% vs new
fiber installation

Fast path to
connectivity for
IoT devices

One EMS to
manage both
fiber and copper
networks

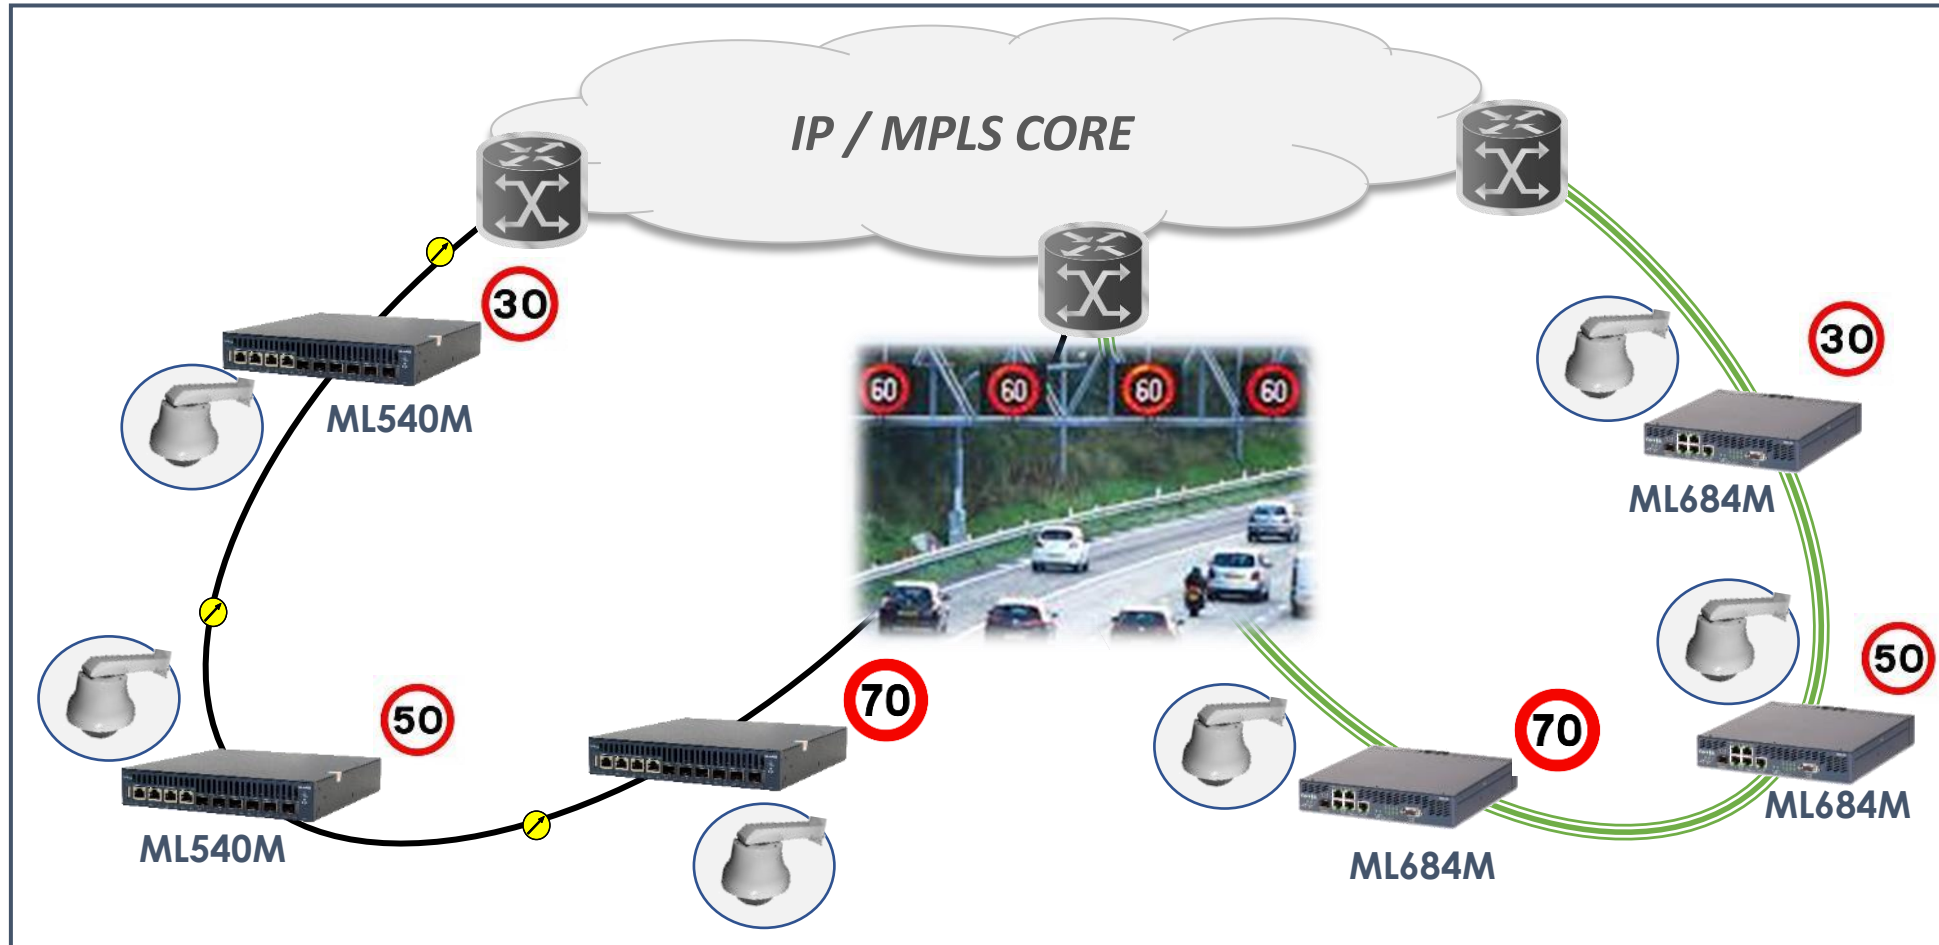

SMART HIGHWAY TRAFFIC USE CASE

- Linear chain or ring topologies
- Fiber or copper infrastructure
- +100 Km, up to 20 nodes fiber / copper

- Gantry Signs
- IP-based cameras
- Smart Sensors
- Optional Remote Powering

HIGH SPEED CONNECTIVITY OVER LONG DISTANCES

UK Highways

Challenge: Supporting digital modernization of assets over long distances

- 30,000 roadside assets to be connected (Gantry signs, signaling, CCTV cameras)
- 4,400 miles of roadways
- 1/3 of network was copper based at time of deployment

Solution: Actelis ML600 (Hybrid), ML500 (Fiber), XR239 Repeaters

- Quick, cost effective deployment of hybrid fiber/copper solution
- Reliable high bandwidth over extremely long distances in ring and linear add-drop topologies

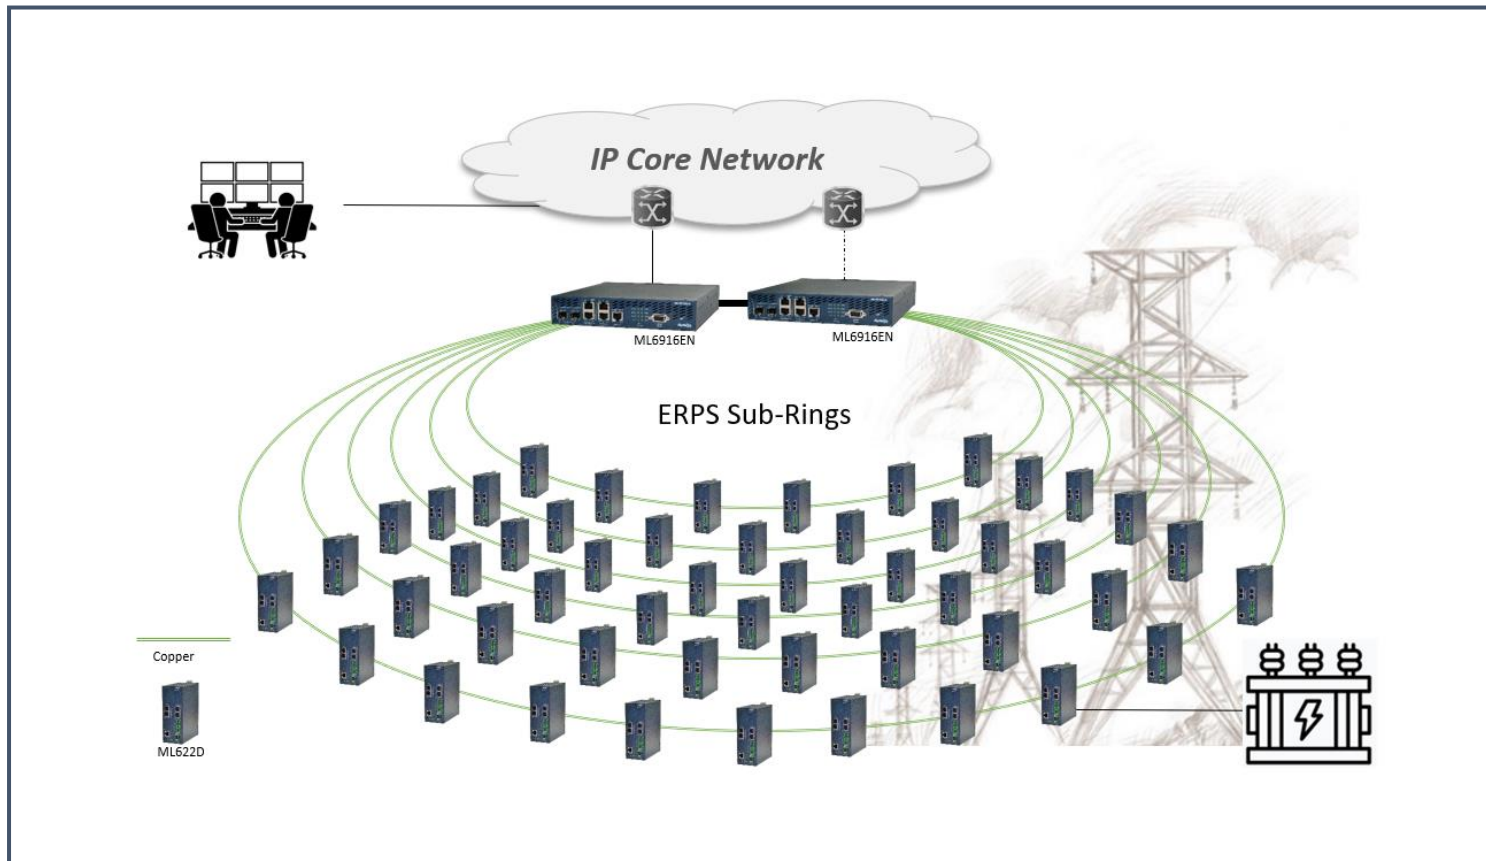

Reliability over long distances

Hybrid switches & smart repeaters

Full remote management limits onsite needs

SMART GRID USE CASE

- Monitor and control regional transformer stations
- ERPS Rings
- Harsh environment
- Advanced EMS Topology View

WHY ACTELIS?

- Years of experience and worldwide deployments in multiple vertical markets
- Extreme reliability over copper, fiber and hybrid infrastructures
- Drop-and-continue and ring topologies are inherently supported
- Cyber-secure – approved by DoD
- All Actelis' products are hardened ensuring that they work in harsh environmental conditions
- L2 and L3 functionality
- One-stop shop for all accessories (cables, SFPs, power adapters, etc.)
- Product Flexibility
- Single management system for all products including 3rd party devices
