

ZUFGLOBUS™

Novel Medicinal Botanical Delivery System Powered by Bees

What differentiates Zuf Globus herbal honeys from regular honey?

Regular honey is produced by bees that gather nectar & pollen in the fields. In contrast, Zuf Globus herbal honeys are produced by bees that are nourished with a scientifically formulated extract including proven medicinal herbs. The result is unique herbal honey products that capture and embody the therapeutic attributes inherent in the specific botanical extracts fed to our bees

LIFEMEL – Herbal Ingredients

The herbal extract that is fed to the bees includes the following botanicals: Vaccinium myrtillus, Beta vulgaris cicla, Ribes nigrum, Chicorium intybus, Taraxacum officinale, Ficus Carica, Inula helenium, Morus alba, Melissa officinalis, Unchair tomentosa, Avena sativa, Echinacea purpurea, Trifolium pratense, Eleuthero coccus senticosus, Urtica dioica, Calendula officinalis

What is LIFEMEL?

LIFEMEL is an exceptional herbal honey, distinguished by its remarkable health-enhancing properties aimed at fortifying the immune system. Our honey is meticulously crafted by bees fed a controlled diet, including 16 proven botanical extracts, during the off-season.

The Potent LIFEMEL Magic

Zuf Globus products benefit from the natural alchemy that occurs within the beehive. This phenomenon significantly enhances the potency of each ingredient and makes them more readily absorbed by the human body.

Clinically Researched

LIFEMEL has been studied in 2 clinical trials to establish its ability to support the immune system in times of stress. It has no side effects, is easy to administer, and is relatively inexpensive (compared to conventional alternatives)

Key Benefits

- 1** Over 1000 bio-actives compared to about 100 in regular honey.
- 2** About 10x the number of Flavonoids compared to regular honey.
- 3** The rich, aromatic honey flavor.
- 4** Clinically tested.
- 5** The unique delivery system for proven botanicals.

ZUFGLOBUS™

Novel Medicinal Botanical Delivery System Powered by Bees

How is LIFEMEL consumed?

LIFEMEL is consumed by placing one teaspoon(5gr) of honey under the tongue- twice daily. This ensures maximal absorption by the body. LIFEMEL can also be added to a hot beverage as a sweetener without affecting the bio actives in the honey

Suggested applications

LIFEMEL and the other 11 herbal honey products can be supplied in individual jars of 120gr or sets of 3 jars(360gr) for use by individuals.

Supply options

The products can be supplied under the Zuf Globus brand or as a white label for retailers and distributors.

LIFEMEL can be used as an ingredient in various products as a natural sweetener with targeted health benefits.

Typical applications as an ingredient

- ✓ Gummies with targeted health benefits
- ✓ Nutritional and energy drinks
- ✓ Lozenges and confectionary, including lollipops with specific health benefits
- ✓ Natural sweetener in OTC products
- ✓ As a natural sweetener for yogurt and other dairy products
- ✓ As a sweetener for food dishes created by Chefs and bakers
