CONNECTIVITY IN ASIA

As a business leader in mobile tech sector in Israel Export institute, we are happy to be back in Singapore for the AsiaTech SG - CommunicAsia 2024. Presenting a holistic group of advanced solutions, tailored for Telecom, Service Providers, Equipment Vendors, Smart device manufacturers, and corporates in related areas.

The Israel Pavilion at the AsiaTech SG - CommunicAsia 2024 will provide a centrally located, high profile venue for 8 Israeli leading high technology companies, presenting the latest solutions for the Connectivity, Mobile security, IoT, Data analytics, OTT and Smart city. these days we see the the Telecom approach of using AI to optimize internal processes and operations, for example creating efficiencies for fuel and power consumption.

The Israeli companies will demonstrate Ai solutions across the board. The pavilion is organized by The Israel Export Institute in cooperation with the Foreign Trade Administration of the Israel Ministry of Economy cooperation with the Foreign Trade Administration of the Israel Ministry of Economy.

THE ISRAEL EXPORT &
INTERNATIONAL COOPERATION INSTITUTE

THE ISRAEL EXPORT & INTERNATIONAL COOPERATION INSTITUTE

The Israel Export & International Cooperation Institute, a nonprofit organization supported by the government of Israel and the private sector, facilitates business ties, joint ventures and strategic alliances between overseas and Israeli companies.

Charged with promoting Israel's business community in foreign markets it provides comprehensive, professional trade information, advice, contacts and promotional activities to Israeli companies.

Furthermore, the IEICI provides complementary services to business people, commercial groups, and business delegations from across the globe: IEICI uses its unique and one of a kind network with the prosperous startup ecosystem in Israel, and connects the foreign players, according to their field of interest.

Valuable information often goes unnoticed in standard video footage. Corsight AI's Facial Intelligence platform can identify individuals from a watchlist, as well as unknown individuals in specific scenarios, by analyzing duration and repetition patterns. Facial Intelligence offers real-time detection of specific scenarios such as shoplifting, identifying VIP customers, ATM fraud, monitoring the speed of queues and more.

Deepchecks is the only LLM evaluation solution that supports the full development lifecycle, from experimentation to production. Giving you the ability to release LLM applications with high quality and minimum risk. This is enabled by a comprehensive testing and monitoring features set: robust automatic scoring, version comparison, and auto-calculated metrics for properties like relevancy, toxicity and hallucinations. Its standout feature is the ability to accurately estimate expected annotations for LLM responses, surpassing common methods like GPT-as-a-judge. The solution is designed to enable both “coders” and “clickers” to iterate quickly while taking full control of both quality and compliance

Founded in 2015, hiSky provides innovative private satellite IoT networks for remote industries in need of connecting assets and workforce from any location. Noteworthy investors include esteemed entities such as ST Engineering's Corporate Venture Capital unit, SDF (the investment arm of United Arab Emirates-based Tawazun Holding), and Intelsat. Operating on partners' GEO and LEO satellites, hiSky offers a variety of different compact satellite terminals called Smartellite™, specifically suitable for IoT connectivity, as displayed in the latest connectivity solution chosen by CNH for their fleets, which is based on the Smartellite™ network. All the technology integrated into hiSky products is developed in-house, enabling the company to adapt to specific customer requirements and respond quickly to market demands.

Additionally, hiSky is in active POCs with various tier-1 automobile manufacturers, attributing knowledge and technology to the in-vehicle NTN connectivity agenda for private vehicles, which is planned to be in the market as of 2027-2028
