

Empower your Edge with HQ-BOX2: Eco-design server for data centers

The HQ-Box2 is a **fanless, energy-efficient** solution designed for **micro data centers**. It provides high-performance edge computing while **minimizing power consumption** producing **zero noise**. Ideal for sustainable data center operations, The HQ-Box2 offers scalable power and performance with a minimal environmental footprint.

- **Up to 18 servers per 6U rack**
- **Low Co2 emissions**
- **Maintenance free**
- **24/7/365 Operation**

Unit Specifications:

- **Processor:** Intel® Xeon® D-1700 / Xeon D-1800
- **Cores:** Up to 10 cores per unit
- **Memory:** Up to 384 GB per unit
- **Ports:** Up to 8 x SFP+ 1/10/25 Gb ports
- **Management:** OpenBMC based IPMI 2.0
