Lean Management Approach

Lean, Flexible Structure

Cost-Effective for Clients
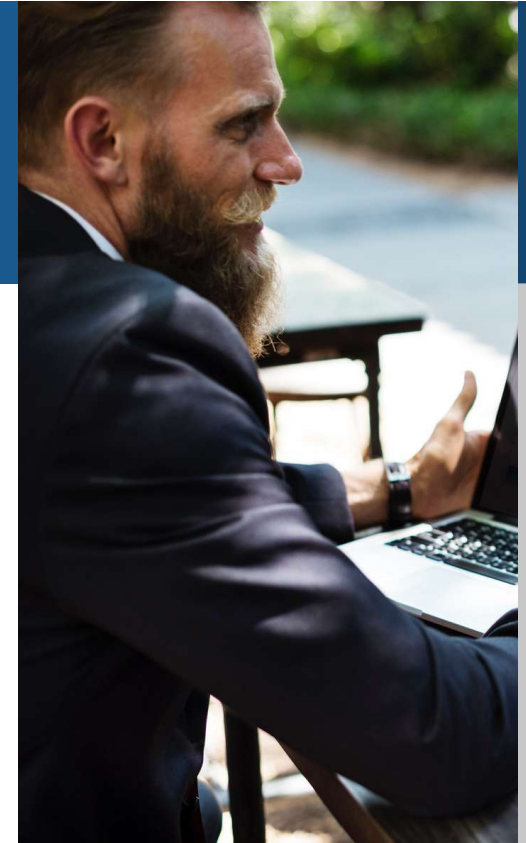

Proactive, Business-Oriented Teams

Ongoing Learning and Improvement

Advantages of Lean Management

Our Customer Segments

- Growing and Large Companies

- Software Development Companies with High-Capacity Projects

- Consulting and Professional Services Companies

Growing and Large Companies

Custom proprietary systems, whether as SaaS or on-premises

Direct project bids or proposals

End-to-end development, from design and implementation to long-term support through comprehensive service agreements

Our Portfolio Customers
Ficohsa bank, hospitals, TAU, Rav Kav

LILIUM

liliumsolutions.com

Example - Growing and Large Companies

Problem
Invalid data in periodic reports of the bank leads to regulator's fines

Solution
A report-validation system for Ficohsa bank to ensure the integrity and accuracy of financial data before it is submitted to regulatory authorities

Consulting and Professional Services Companies

This segment includes consulting, advisory, and IT services firms seeking to enhance their portfolios

By partnering with Lilium, these firms can offer tailored development as a service

These engagements are structured around a commission-based referral model

Our Portfolio Customers
SAInnovation, Amit Peretz, Yaniv Arazi

Example - Consulting and Professional Services Companies

Problem
Companies with limited scope of offering only a solution without full implementation

Solution
Together we complete their expertise in consulting and product management, with us being the development side

sainnovation

Software Development Companies with High-Capacity Projects

large-scale projects require additional resources to meet project demands

Collaboration on a work-share or white-label basis

Engagement Type - packages and, where necessary, ongoing support arrangements

Our Portfolio Customers
Coral Technologies, Log-On, Comm-IT, Yair Shirazi

LILIUM

liliumsolutions.com

Example - Consulting and Professional Services Companies

Problem

Companies broader scope and high number of projects need more human resource

Solution

We deliver their projects as sub-contractors

Startups with Technology-Driven Ideas

Early-stage system development, including Proof of Concept (POC) and initial product versions

Leaders focus on core innovations while relying on Lilium's technical expertise

As the startup grows, Lilium's systems can scale and evolve

Our Portfolio Customers
Fast time-to-market, lower initial investment, expert guidance

LILIUM

# Example - Startups with Technology-Driven Ideas

Problem

Model agencies need to manage their scouting look everywhere for the next model

Solution

BAModel is a platform for connecting model agencies, with multiple services and advanced technologies including AI recommendations

Let's Get Started

1. Initial Consultation

2. Needs Assessment

3. Project planning & kickoff

4. Development & Iterative Feedback

5. Deployment & Support Contract
