THE ISRAEL EXPORT &
INTERNATIONAL COOPERATION INSTITUTE

INSPIRED BY INNOVATION, CONNECTED AND COORDINATED...

The Israel Export and International Cooperation Institute, supported by member firms, private sector bodies and the government of Israel, advances business relationships between Israeli exporters and overseas businesses and organizations. By providing a wide range of export-oriented services to Israeli companies and complementary services to the international business community, the Institute helps build successful joint ventures, strategic alliances and trade partnerships.

The Israel Export Institute (IEI), represents **over 500 exporting companies** in the **Homeland Security** arena. Israeli HLS companies offer technologically advanced, field proven products and solutions that are among the most innovative anywhere. They are successfully partnering with key world players to ensure public safety, protecting air and seaports, borders, government installations, financial institutions, recreation centers, public venues and more. The sector works with foreign government ministries and their agencies, as well as with industry bodies, to promote private industry joint ventures and international partnership

Discover Israel's Homeland Security & Aerospace Industry with IEICI.

Ministry of Economy and Industry
Foreign Trade Administration

THE FOREIGN TRADE ADMINISTRATION (FTA) AT THE ISRAELI MINISTRY OF ECONOMY AND INDUSTRY

The Foreign Trade Administration (FTA) at the Israeli Ministry of Economy and Industry directs and supports Israel's international trade and trade policy.

Through our headquarters in Jerusalem together with over 45 economic and trade missions in key financial centers throughout the world, the FTA promotes Israel's economy worldwide.

Israel's economic and trade missions are at the forefront of the Israeli government's efforts to boost our industries in foreign markets. Our network of highly experienced economic representatives provide a wide range of services to Israeli companies and to the international business community.

Custom made battery packs and charging systems

Amicell - Amit Industries Ltd is a leading Israeli manufacturer of custom-made battery packs and charging systems, we provide full and optimal solutions per our customer's needs and their application's requirements.

Among our customers: RAFAEL, IDF, ELBIT, AERONAUTICS, LOCKHEED MARTIN, EDGE AUTONOMY, DELAIR TECH etc.

Amicell recently reached to the highest energy density within the Li-Polymer field - 370wh/kg.

Tactical Intelligence Redefined

Ateros offers tactical signalling intelligence (SIGINT) solutions, commonly known as IMSI catchers, for cellular networks (2G to 5G SA). These solutions support security agencies in gathering intelligence and conducting investigations to combat crime and terrorism. Ateros IMSI catcher systems can identify mobile devices at specific locations by collecting various identifiers from the air, such as IMSI and IMEI. The systems can also accurately locate targets and intercept voice calls and SMS messages. The systems are available in multiple form factors, enabling flexible deployment on vehicles, backpacks, motorcycles, drones, airplanes, and helicopters. This adaptability makes them ideal for urban investigations and surveillance, as well as for the protection of borders and other sensitive zones. In addition, Ateros offers an end-to-end Counter Drone Solution (CDS) designed to protect restricted and sensitive areas. The Ateros CDS enables the detection, investigation, and mitigation of drone threats through an integrated suite of detection and mitigation sensors.

It offers a unified, easy-to-use situational awareness and control interface, ensuring comprehensive airspace protection. Ateros is a world-leading manufacturer of IMSI catchers, jammers, direction finders, and other RF equipment. Our focus is on innovation and technology, backed by over 20 years of real-world operational experience. Today, customers around the world rely on our systems every day - in the field, in critical missions, and in the most demanding environments.

-

Corsight AI provides real-time face intelligence and behavioral analytics, empowering surveillance systems with actionable insights, even in the most challenging conditions.

Valuable information often goes unnoticed in standard video footage. Corsight AI's Face Intelligence platform identifies persons of interest in real time, even under extreme conditions - poor lighting, low-res feeds, and obscured angles. It uncovers critical insights by recognizing watchlisted individuals, detecting unknown persons, and analyzing behavioral patterns. By tracking frequency, duration, and repeated appearances, it detects loitering, unauthorized access, and other suspicious activity - turning standard surveillance into actionable intelligence. Trusted by police forces, forensic teams, and government agencies worldwide, Corsight AI enhances safety, situational awareness, and privacy in complex environments.

D-Fend Solutions is the leading field-proven, RF cyber-based counter-drone takeover technology provider.

D-Fend Solutions is the leading field-proven RF, cyber-based, non-kinetic, non-jamming, counter-drone takeover technology provider, enabling control, safety and continuity during rogue drone incidents across complex and sensitive environments. With thousands of successful deployments performed worldwide, EnforceAir, the company's core offering, focuses on the most dangerous drone threats in military, public safety, airport, prison, major events and critical infrastructure environments. Chosen as best-in-class, EnforceAir is deployed at top-tier U.S. government agencies and major international airports globally. EnforceAir autonomously executes RF cyber-takeovers of rogue drones for safe landings and controlled outcomes, ensuring the smooth flow of communications, commerce, transportation, and everyday life.

Falkor is the AI-powered investigative analytics hub — helping government agencies transform fragmented data into actionable intelligence.

Falkor turns fragmented data into actionable intelligence, powering critical investigations in the cloud or on-premises through an advanced AI-driven hub. Falkor is an AI-powered investigation platform that aggregates any data into a secure, collaborative hub. It helps investigative teams uncover hidden connections, analyze complex cases, and derive actionable insights. Key tools include data integration, OSINT enrichment, link analysis, media analytics, geospatial analysis, and other advanced AI tools for smarter search, summaries, and data discovery. We're here to change how investigations are done across law enforcement, homeland security, border security, and other government agencies.

Our team brings together AI scientists, intelligence analysts, data engineers, developers and customer success experts. All are dedicated to making investigations smarter and faster.

Detection Solutions

IDenta was founded with the mission of development, production and global distribution of advanced field detection kits for drugs, explosives and unique forensic products. Our cutting-edge kits are engineered to identify suspect substances—including powders, liquids, and trace residues—down to nanogram levels within seconds.

Uniquely patented and rigorously tested, each kit is compact, robust, intuitive to operate, and ensures absolute safety while delivering immediate, reliable results. IDenta's proprietary technology meets and exceeds the most stringent international standards and is trusted by leading governmental and security agencies worldwide.

Octopus' AI-powered Command and Control Center unifies physical, IT, cyber, and OSINT data into a single Fusion Platform—enabling real-time, intelligence-driven decisions to stay ahead of threats.

Founded in 2013, Octopus is a leading provider of AI-powered Data Fusion Command and Control Centers, serving 130 customers across 28 countries and 16 languages. Octopus' Data Fusion Command & Control platform unifies vast and disparate data streams into a single Fusion solution, enabling real-time, intelligence-driven decisions and actions to proactively counter evolving threats. The advanced Command & Control Center empowers organizations to easily access, from one central SOC, all their physical, IT, IOT, cyber and OSINT needs through an intelligent unified AI Fusion solution, making their world safer.

Octopus is a dual-use company working with defense, homeland security, critical infrastructure, smart cities, tech and finance organizations to stay ahead of threats through real-time, insight-driven action, while improving all key security metrics.

Your Last Line of Defense Against Hostile Drones

“ParaZero Technologies Ltd. is a leading aerospace technology company specializing in advanced safety systems for unmanned aerial systems (UAS), with solutions serving both the commercial drone industry and defense applications—including counter-UAS technologies and military-grade logistics systems.

With a strong foundation in aviation safety and innovation, ParaZero’s mission is to enable the safe and effective integration of UAS into complex airspaces worldwide. The company’s comprehensive product portfolio supports a wide range of operational requirements from commercial drone operations in urban environments to tactical military deployments, positioning ParaZero as a key enabler in the evolving global aerospace ecosystem.

Visual autonomy (GPS-free) for critical drone missions

Sightec delivers scalable, software-based visual autonomy for GNSS-free drone operations—combat-proven, lightweight, affordable, and hardware-agnostic, deployable on any platform.

Powered by advanced computer vision and AI, Sightec's solutions provide real-time situational awareness—including visual navigation, safe landing, obstacle avoidance, detection & tracking, and change detection—day or night, fully GNSS-free.

At the core is NavSight, a field-proven visual navigation system designed for safe, GNSS-free drone missions. With over 2,500 successful deployments, NavSight enables reliable operation in GNSS-denied or degraded environments, including electronic warfare and urban settings. Sightec serves governments, OEMs, integrators, and service providers across defense, homeland security, aerospace, and delivery, powering autonomy where resilience and scale matter most.

Detection Denied.

Spectralx (formerly Polaris Solutions) is a cutting-edge stealth technology company founded by former Special Operations Forces (SOF) personnel, dedicated to enhancing the battlefield survivability of operational forces. Our mission is clear: prevent detection and empower every combatant with the advantage needed TO COMPETE AND WIN! Spectralx achieves this by leveraging deep operational expertise and developing innovative, effective, and field-proven survivability solutions.

Our technologies serve a wide range of domains, including:

Special Forces • Land Forces • Maritime Units • Aerial Platforms • Missile and Air Defense Systems

Through relentless innovation and mission-driven design, Spectralx ensures today's warriors maintain the decisive edge in tomorrow's battles.

Visual Intelligence at Any Scale, for Any Team

Visual Layer is redefining how defense and security teams extract mission-critical insights from overwhelming volumes of satellite, drone, and surveillance imagery. Our unified platform makes it simple for any organization to search, curate, and collaborate on petabytes of visual data—no advanced technical skill required. Backed by innovators from Carnegie Mellon, Stanford, and the University of Washington, with a track record of building foundational AI tools, we bring proven expertise to every deployment. Supported by top-tier VCs, Visual Layer now empowers not only defense but also retail and healthcare enterprises to turn massive visual archives into actionable intelligence. Like ChatGPT for AI or Cursor for code, we're making AI-native visual intelligence the new standard for every enterprise.

Provider of Strategic Mass Geolocation, ADINT, Telegram content and Imsi Catchers data , Collection and Analysis solutions

Wave Guard Technologies is a leading expert in extracting and analyzing strategic big data geo-location information from cellular networks, ADINT, social networks, and IMSI catcher devices. The company provides advanced intelligence insights for homeland security organizations, emergency services, and government entities. Wave Guard's solutions redefine accuracy, flexibility, and target reach in mobile-based mass geolocation detection, cyber data tracking, and data fusion. Founded in 2009, Wave Guard's solutions are based on advanced AI and ML software innovations with several approved patents. The company's systems are operationally implemented by law enforcement agencies and government organizations worldwide.

Investigation powered by GenAI

Wisery Labs was founded to provide an innovative solution to the challenges faced by law enforcement, national security and intelligence agencies. By leveraging the Generative AI revolution, we offer disruptive intelligence solutions that are significantly wiser than before, while the critical importance of reliability & traceability is weaved into every solution.

Our team is a blend of AI researchers capable of understanding the potential and capabilities of AI and Generative AI, and industry professionals with a deep understanding of the pains, challenges and needs of our customers - law enforcements, national security and intelligence agencies.

We are aiming as much as possible to collaborate and share ideas, challenges and discuss technical and methodological approaches in professional engagements, and to design a customer-driven solution.
