# Wireless Power for Smart Locks

# Value Proposition

Smart locks fail when batteries die, creating lockouts, service calls and ongoing maintenance

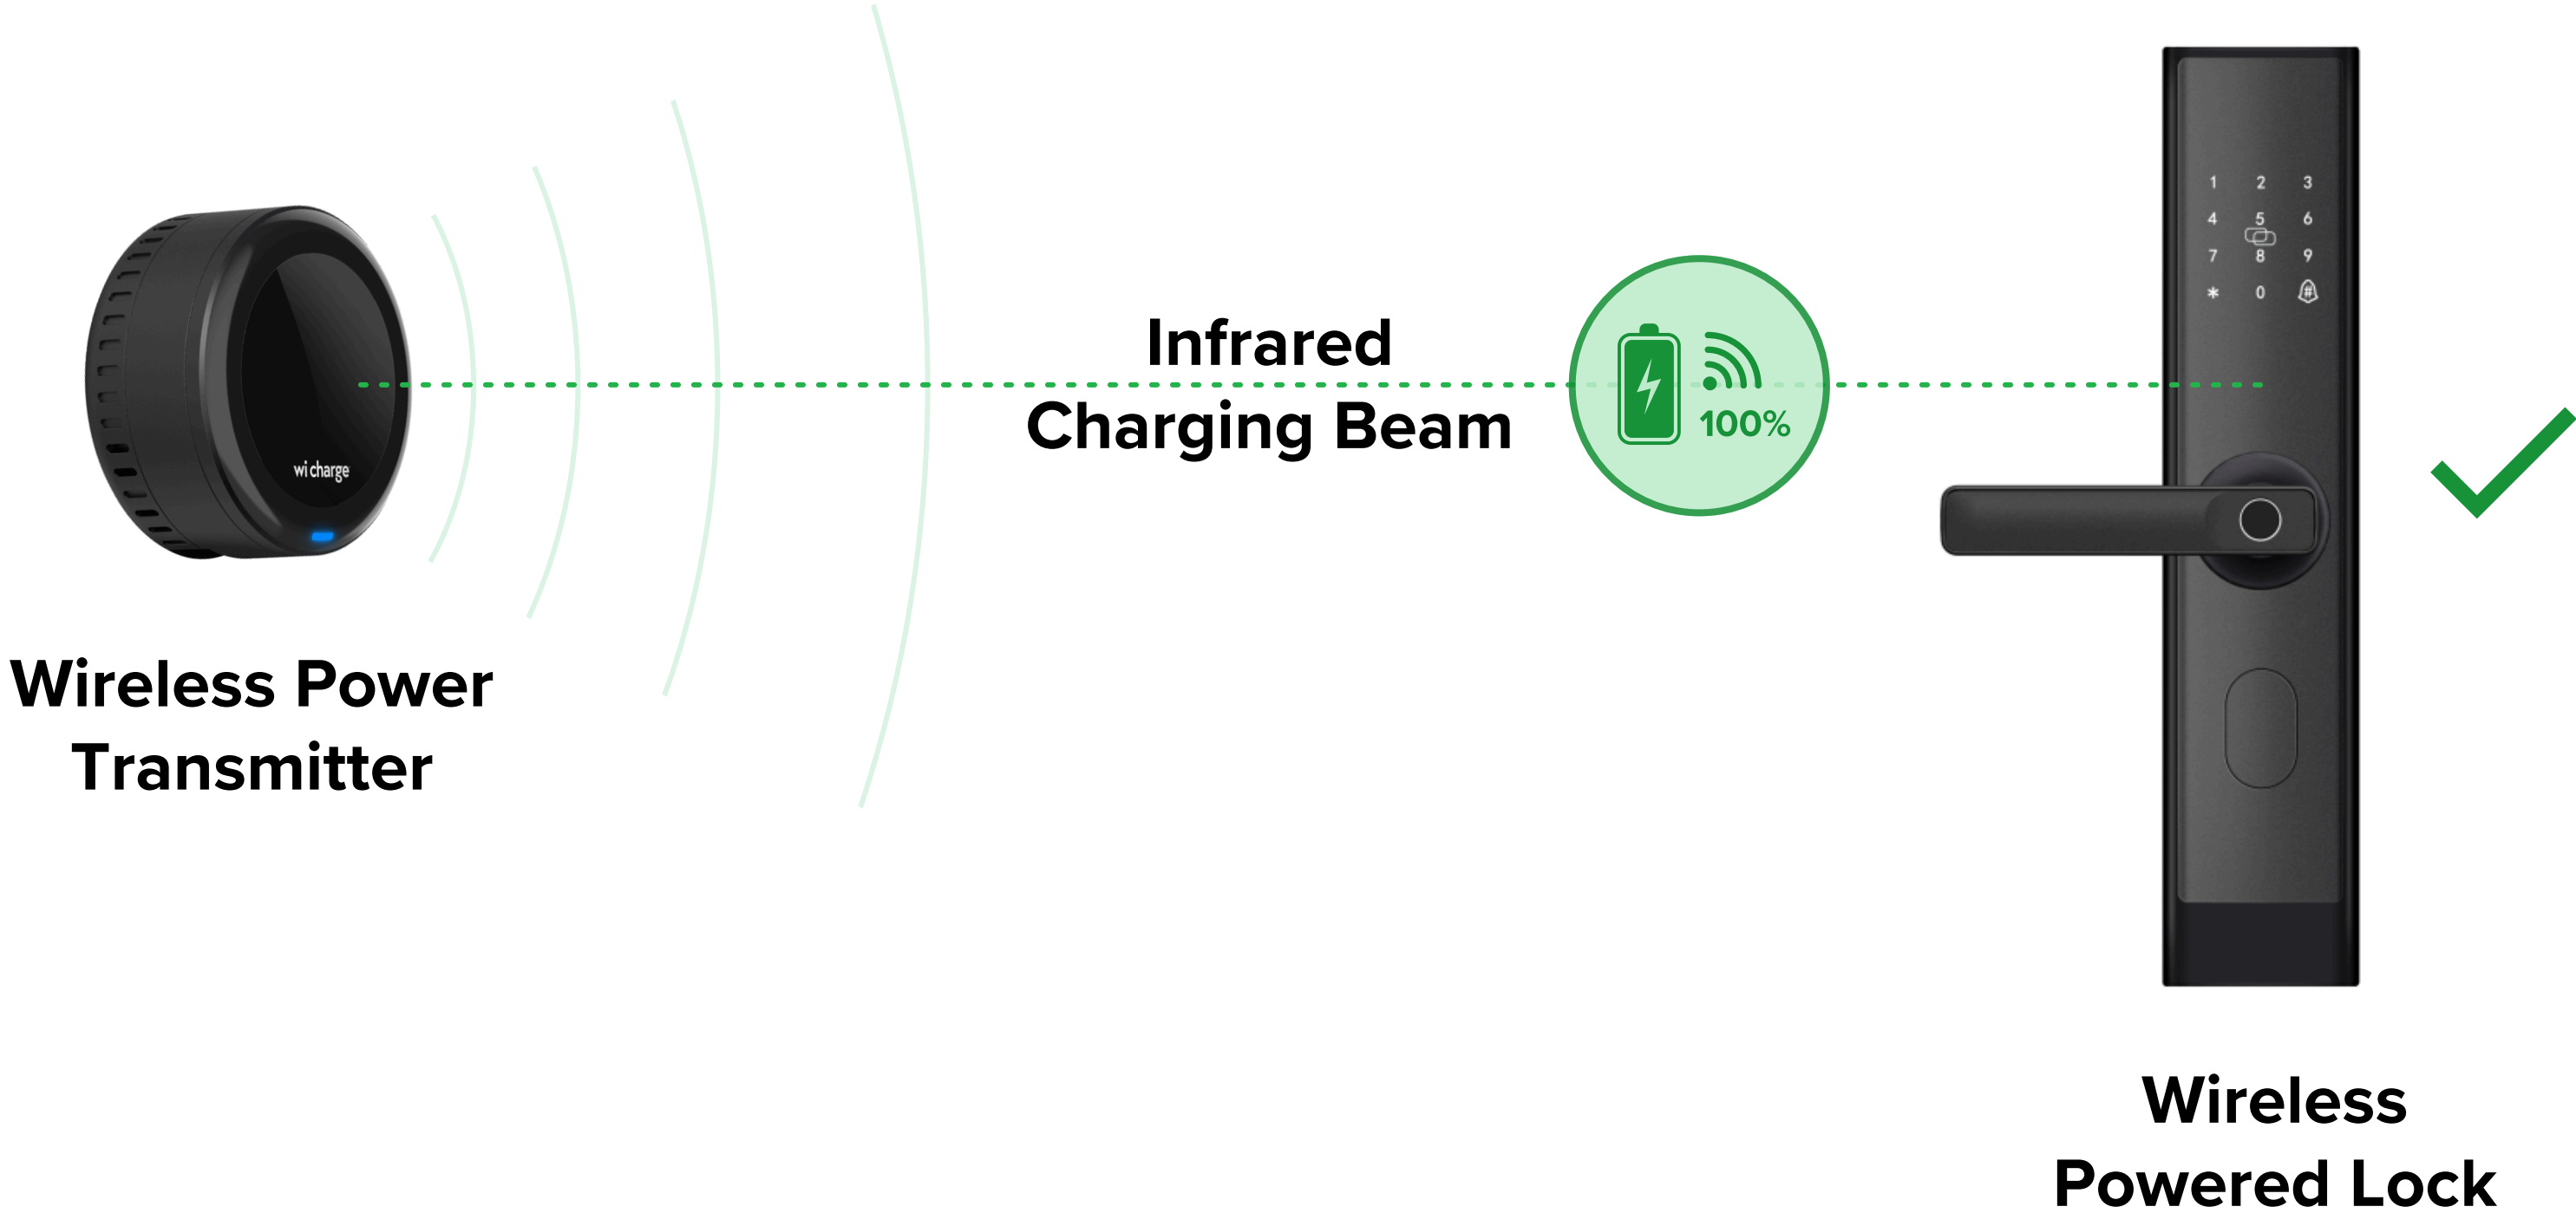

## The solution - wireless power:

- No lockouts
- No battery swaps
- Keeping locks always charged without any wiring or complicated installs

Significantly cutting on maintenance cost for operators and increasing their NOI

# How it works

# Global Availability

Deployed in US, Canada, EU and Middle East

**Residential  
Biometric or simple locks**

**Commercial  
Wi-Fi Locks**

**MDUs and Rentals  
Deadbolt/mortise Locks**

# Next steps...

1. Email us
2. We will retrofit your lock to wireless power
3. Timeline: 3-5 business days! We're doing all the engineering
4. You bring the lock; we do the rest
5. Test first-hand the magical UX of wireless power

**Add wireless power to your locks offering and boost your brand value**

The days of cables or  
battery swaps are over
