# Coffee-Tech Engineering Company Overview

## Coffee Roasting Innovation

Coffee-Tech Engineering is a leading manufacturer of coffee roasting equipment. We have been developing and advancing roasting innovation for three decades. Passionate about making the best coffee roasters, our award-winning products set the industry standard in technology and design.

We have dedicated extensive research to manufacturing our premium coffee roasters, providing incredible taste, aroma, and maximized extractable properties in every batch. Operating a Coffee-Tech Engineering roaster is an experience like no other. Granting the roast-master a smooth ride, a perfectly designed user experience, and ultimate control over the results.

## Vast Network of Distributors

Coffee-Tech Engineering runs a global distribution chain operated by certified professionals skilled at servicing our equipment. With dozens of active distributors worldwide, Coffee-Tech Engineering has the reach and volume to provide commercial and shop roasters anywhere in the world. We maintain a strong presence in key markets worldwide with loyal Coffee-Tech lovers, users, and distributors.

## Environmental & Sustainable

We are strongly committed to environmental sustainability, consistently developing and delivering cutting-edge green solutions. We take pride in our proactive approach to sustainability, constantly refining our products and methodologies to achieve comprehensive sustainability.

---

## Vision

Our vision is to advance the field of coffee in every aspect possible by developing innovative technologies. We constantly broaden our expertise and creative ingenuity to reinvent methodologies, revolutionize standards, and advance breakthroughs that bring the world closer to the perfect cup of coffee. Ultimately, we vision our world-class roasting machines to be in the atelier of every coffee roaster, serving them as their preferred tool.

## Mission

Our mission is to continue revolutionizing the coffee industry by combining our innovative and quality-oriented approach with our passionate company spirit. We comply with the industry's most stringent quality and manufacturing standards, providing the latest technology, top efficiency, and advanced safety features.

---

# Advantages of Distributorship

---

## Geographic Location

Located along the Mediterranean, Coffee-Tech Engineering is in a great position geographically to operate a vast distribution network worldwide while also enjoying excellent conditions and an environment that enable smooth manufacturing.

## Production Capacity

With a full staff of mechanical engineers, software experts, electricians, welders, and artisan builders, our roasters are produced and shipped on a precise timetable that meets deadlines and shipping dates.

## Cutting-Edge Technology

With the best engineering capacity available, our limit is your imagination. We are constantly working on the next breakthrough, driven by our immense passion for coffee innovation and technology.

## International Product Demand

We actively market in countries that show interest and have a sales flow that reflects marketing efforts. As a result, our distributors benefit from both their marketing and that provided by us. For two decades, we have been international exhibitors for the WOC, SCA, TriestExpo, Intergastra, and other international trade shows and coffee events, placing us as one of the most active companies in the field.

## Care and Maintenance

Coffee-Tech Engineering has excellent distributor pricing and support. Save time and effort with our precision-made machines that simplify repair and maintenance.

# Our Products

---

## Shop Roasters

### Solar Eco

2 kg

**Automatic & intuitive,**  
start roasting coffee with  
the push of a button

### FZ94 Evo

100 gr-2.4 kg

**Flexible & controlled,**  
explore the full range  
of coffee roasting  
possibilities

### Silon ZR7

7 kg

**Fast & precise,**  
master the art of coffee  
roasting with unlimited  
control

## Commercial Roasters

### Ghibli R15

15 kg

**Professional & robust,**  
step into the world of  
commercial coffee with  
confidence

### Ghibli Firewood

15 kg

**Unique & artisanal,**  
infuse your coffee with  
special flavors and  
aromas

### Ghibli R30

30 kg

**Powerful & efficient,**  
maximize performance  
and minimize energy  
consumption

### Ghibli R90

90 kg

**Functional & reliable,**  
produce high-quality  
coffee while roasting in  
large volumes

## Smokeless Systems

### Avirnaki

For Solar Eco & FZ94 Evo

**Clean & green,**  
eliminate all emissions  
with maximum efficiency

### Commercial Avirnaki

For Silon ZR7

**Modular & electric,**  
Save gas costs by using  
electrical filtration system

### Afterburner

For Silon ZR7, Ghibli R15, Ghibli R30

**Compact advanced & efficient,**  
emits 0% smoke, odors,  
or smell & chaff to protect the  
environment, & community while  
saving floor space
