

# MASKILIZER

## PURPOSE

The Maskilizer is an innovative device, developed by Guppy Tech, designed to make mask sanitation effortless and affordable. The Maskilizer offers a quick and deep sanitation of face masks in a regular microwave in just 2.5 minutes. The masks come out dry and clean and can be reused straight after the process. The Maskilizer can be used with every reusable face mask.

## WHY SHOULD I USE IT?

### PROTECTS YOUR HEALTH

Enables easy removal of the germs and viruses that attach to the inner and outer part of the mask, making your environment safer.

### SAVES MONEY

The Maskilizer enables the use of the same mask multiple times without significant energy consumption, saving water and detergents.

### SAVES TIME

It only takes 2 min 30 sec for your mask to be completely sanitized. This is the fastest cleaning process for reusable masks. The Maskilizer is an essential household item for everyday use.

### SAVES THE PLANET

Any time you discard a disposable mask, it increases environmental pollution. By using this device, you are directly contributing to the protection of our planet.

## HOW TO USE IT?

- 1 Pour water into the container up to the line marking the maximum level of liquid, add Maskilizer scents
- 2 Lock the Maskilizer with the upper clasp
- 3 Insert the Maskilizer with the masks into the microwave and turn on full power for 4 mins and 30 sec
- 4 Remove it from the microwave and open carefully (beware of the steam when opening the lid)
- 5 Remove the tray and take out the masks; now they are ready for re-use

# MASKILIZER

## PATENTED DEVICE

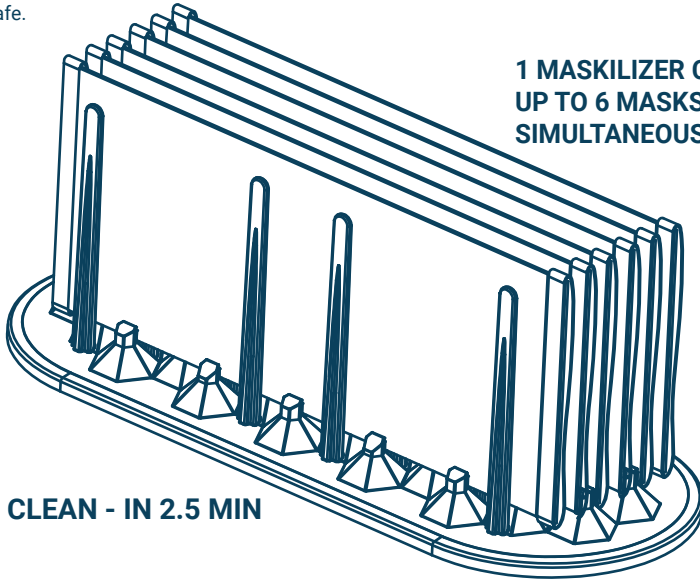

### WHAT IS IT MADE FROM?

The Maskilizer is made of polypropylene and does not contain toxic Bisphenol A. The material is completely safe for use in a microwave and is dishwasher safe.

The Maskilizer is based on the technology of steam cleaning.

The heat from the vapour saponifies the dirt whilst the pressure at which the steam is being released onto the surfaces ensures it quickly penetrates into the surface without causing surface damage or destruction.

**1 MASKILIZER CAN CLEAN  
UP TO 6 MASKS  
SIMULTANEOUSLY**

**DRY AND CLEAN - IN 2.5 MIN**

The product should be used only for its intended purpose  
Do not insert metal parts into the microwave (make sure there are no metal parts inside the mask before using the Maskilizer)  
Beware of the hot steam when opening the lid  
Do not add materials to the water other than those provided by Gutty Tech  
Do not use oils in the water
