

September 2021

We develop a leading **end-to-end IoT solutions** that allow people and businesses to stay connected to each other and to their belongings through **real-time location tracking**.

Based on advanced **proprietary technology** and supported by our range of **tracking devices**, we provide a bespoke and affordable solution, designed to be tailored to every business' unique requirements.

# END-TO-END SOLUTION

We are a one-stop-shop providing, manufacturing and supporting the entire cycle:

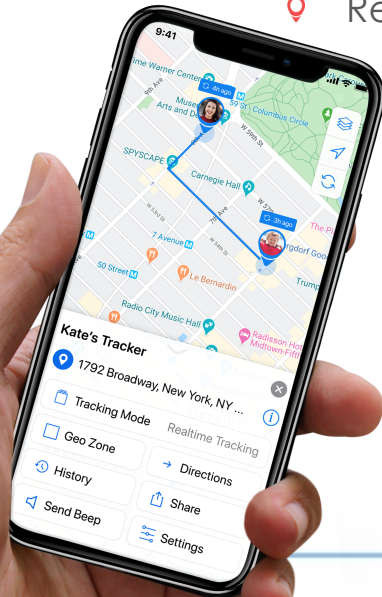

# STAY CONNECTED ANYWHERE

Our intuitive web and app platforms serve as the remote portal to your important assets

## Features Include:

- 📍 Live global map view
- 📍 Track and monitor numerous assets under a single user
- 📍 Set virtual geofence perimeters and receive live alerts
- 📍 Asset speed monitoring
- 📍 Share asset location
- 📍 Review location history

...and more

# FLEET MANAGEMENT, LOGISTICS & SUPPLY CHAIN

Ensure the safety and proper handling of shipments of all sorts and sizes while traveling– from the moment assets leave the factory to the very moment they arrive at their final destination

## Traveling by Road

- 📍 Vehicle on-boarding to direct power supply
- 📍 Sensor hub to monitor environmental conditions while travelling for regular and cooler trucks (eg. Temperature, humidity, pressure etc.)
- 📍 Driver behavior data for analytics (eg. speed, movement)

# INTRODUCING IoT TO YOUR INDUSTRIAL BATTERIES

A plug-and-play, real-time tracker that can locate and monitor battery performance remotely

## Transforming any ordinary industrial battery into a smart one

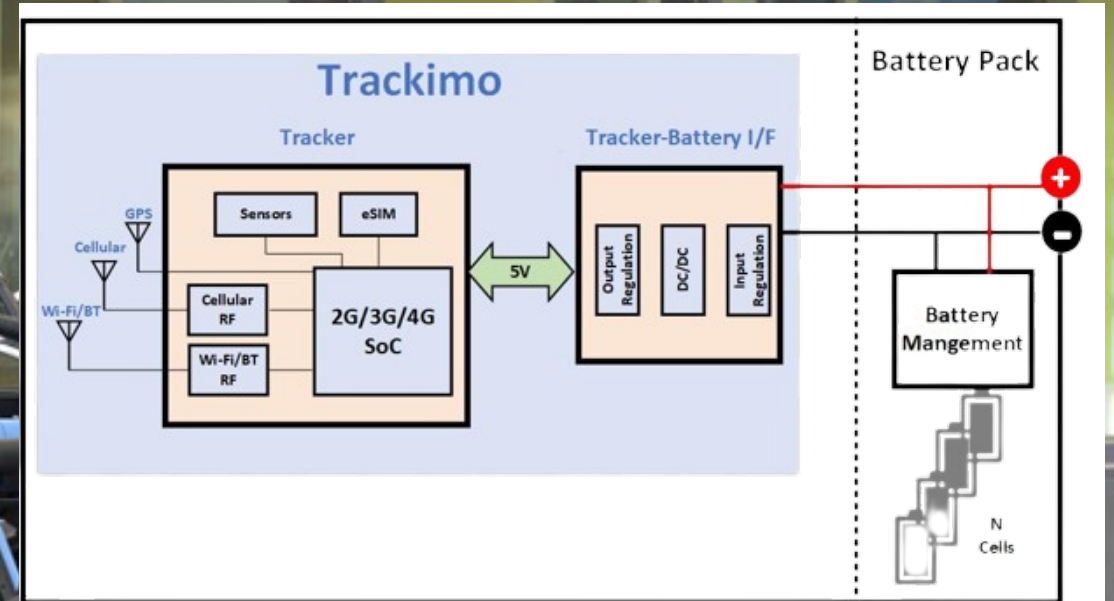

Integrating Trackimo's technology and cloud services

## Tailor-made modifications

Modules are fitted according to specific battery requirements

## Monitor battery and the attached product from anywhere

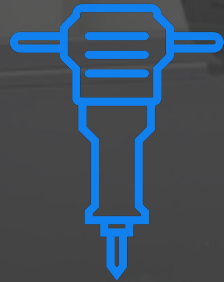

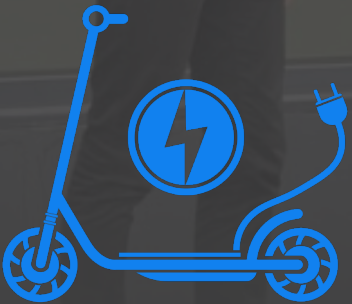

Monitor all assets with a single account on Trackimo's web platform / app

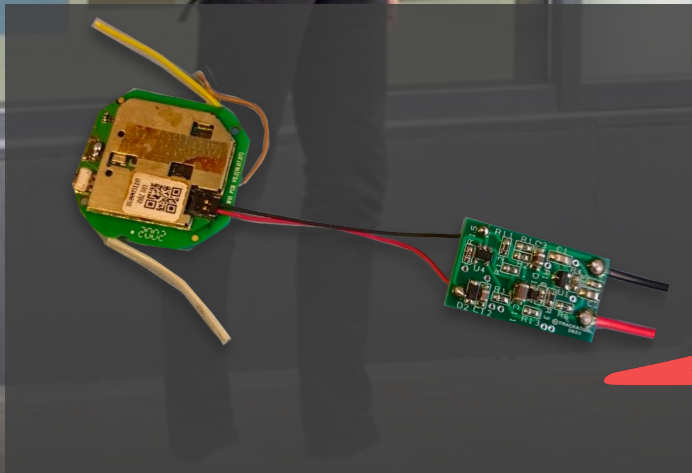

# ENDLESS APPLICATIONS

- 📍 Micro-mobility / shared mobility
- 📍 Industrial mobile assets and tools
- 📍 On-site equipment

# RE-DISCOVER YOUR BATTERY - FEATURES

- 📍 **Real-time, global location tracking**  
Keep an eye on your mobile devices to prevent theft / loss
- 📍 **Health monitoring**  
Low-battery alerts make sure you're on top of battery status
- 📍 **Performance monitoring**  
Follow asset movement, supervise battery heat fluctuation, track asset movement speed
- 📍 **Geofencing alerts**  
Set up a perimeter to keep your assets safe and under control

# TRACKING DEVICES

Our range of personal tracking devices are sold worldwide to ensure safety and connectivity with loved ones as well as personal belongings
