2Sens Ltd.

www.2sens.co

Mixed-Reality in real-time: 2Sens solution turns any device with dual-camera to a Mixed-Reality device. The solution allows to truly mix between the virtual content and the real world, including Occlusion and Interaction. All, while the real-world is dynamically changing. 2Sens real-time solution is applicable for both AR glasses and smartphones

- AR/VR

Anagog Ltd.

www.anagog.com

We provide solutions based on mobility and location data, for analysis, prediction, optimal recommendation and user engagement based on our customers' users surroundings. Through our technologies, we provide the ability for businesses to understand their customers better.

- AI

Brodmann17

www.brodmann17.com

We developed a game changer neural network technology that can run deep-learning vision even on commodity processors. Our technology achieves highest accuracy results while consuming only a fraction of computing power making it an excellent solution to the industry's toughest demands of autonomous vehicles and Advanced Driver Assistance.

CipherSiP

www.ciphersip.com

CipherSiP created a way of authenticating components and messages travelling between them using watermarking technology. Our technology also transfers up to 3 times the data within low-bandwidth automotive and industrial protocols such as CANBUS, and unlike other solutions we do not "touch" the CANBUS or create any other non-standard interference.

Edgybees

www.edgybees.com

Edgybees brings full visibility and understanding to any dynamic scenes by creating collaborative virtual worlds on top of any real world scene. This Augmented Real-time Intelligence™ fuses computer vision, multi-sensor data analytics and 3D video generation to provide a simple visual layer of highly accurate, real-time information.

- AR/VR

Firedome

www.firedome.io

Firedome developed a unique EDR solution for smart home IoT. Our software-only product can be installed on devices at any time, even deployed devices. The devices continuously adapt to new threats and provide an autonomous cyber solution to vendors. Our agent protects against all major cyber threats including DoS, RCE, cryptojacking etc.
