

Impact from Day One, Not 'One Day'

End-to-end machine health solution with
payback in under 3 months

We believe that digital solutions should solve critical business problems and provide value from day one. Whether your goal is to reduce downtime, improve plant productivity, or increase OEE, Augury's Digital Machine Health solution gives you insights that bring immediate and lasting impact to your organization. Many of our clients see a program payback period of only weeks after Augury's solution is deployed.

Quick time-to-value takes more than great technology. It takes a dedicated team and a proven playbook that focuses on immediate machine health improvement, effective onboarding, and a passion for customer success. Every client is assigned a team of Reliability Experts and Customer Success Managers, ensuring results are quickly realized, captured, and continue to align with your goals.

Leading manufacturing companies trust Augury to transform the way they keep their machines, production lines and facilities running.
