Company Profile

Data Science Group (DSG) has recently launched *e-volve*, the world's first AI performance management platform for financial institutions, allowing investors, hedge funds, insurance companies, and banks to retain and improve their business performance automatically over time. The e-volve has been validated across dozens of enterprise use cases globally, providing financial institutions the ability to monitor and optimize AI-enabled business processes.   e-volve relies on the most cutting-edge machine learning technologies developed by world-renowned AI experts while mitigating risk through the highest level of AI governance. DSG's vision is to enable any financial institution to enjoy the fruits of the AI revolution while ensuring their AI models are safe and accurate in production environments. With extensive reports to business stakeholders, regulators, and research teams, e-volve allows every member of your organization to feel protected and included in the process of implementing reliable AI innovations safely over time.

Stock Forecast Based On a Predictive Algorithm

Company Profile

I Know First developed an advanced predictive algorithm for capital markets that utilizes artificial intelligence and machine learning. It generates daily predictions for more than 10,500 assets and ranks them to discover the best investment opportunities. The coverage includes stocks, currencies, commodities, ETFs, interest rates, and market indices from over 50 global stock exchanges in the USA, Canada, Europe, Hong Kong, China, Australia, Singapore, Japan, India and more. The I Know First algorithm is designed for large financial institutions, e.g. banks and hedge funds, Asset management firms, family offices and wealth management firms, as well as private investors looking for an advanced algorithmic trade support system. Over the last years, I Know First received several international awards, including Best International Start-Up Award for its AI Predictive Algorithm at Geneva WealthTech Forum.

Algorithmic Portfolio
Management
Platform

Company Profile

BondIT is an independent portfolio construction
technology provider for fixed income. Empowering
today's portfolio manager and financial advisor,
BondIT's scalable technology platform leverages
machine learning and data science techniques to
provide optimized portfolios and analysis without
sacrificing flexibility. The platform allows for the
seamless onboarding of internal models as well as
downstream connectivity to existing portfolio
management and trading systems.
BondIT is privately owned and data-agnostic, paving
the way for financial institutions of all sizes to
integrate via API's and power their investment
technologies.

Securities lending platform

Company Profile

Sharegain is aiming to open up the global securities lending market to individual investors, allowing them to access a market largely restricted to institutional investors. Sharegain enables investors to lend their stocks, bonds, and ETFs and generate additional returns on them.

The company provides investors with the ability to generate a practically risk-free return without the legacy issues current incumbents have to deal with.
