

UNLOCK THE NEXT LEVEL OF DRIVING EXCELLENCE

CU-BX contact-free safety and wellness solutions provide consistent monitoring of key vital signs to enable a better on-road experience for drivers and passengers.

CONTACT-FREE SENSING

CU-BX's passive in-cabin monitoring platforms provide the most accurate, comfortable and convenient solution to assess key wellness & safety indicators while protecting driver and passenger privacy.

VERSATILE SOLUTIONS

Proprietary technology transforms changes in surface level nano-motions to detect key vital signs such as heart rate, respiratory rate and heart rate variability.

CU-BX technology operates either as a standalone platform or when integrated into existing OEM camera-based driver monitoring software technologies.
