

Creating  
NEW BUSINESS  
FROM  
HI-TECHNOLOGY

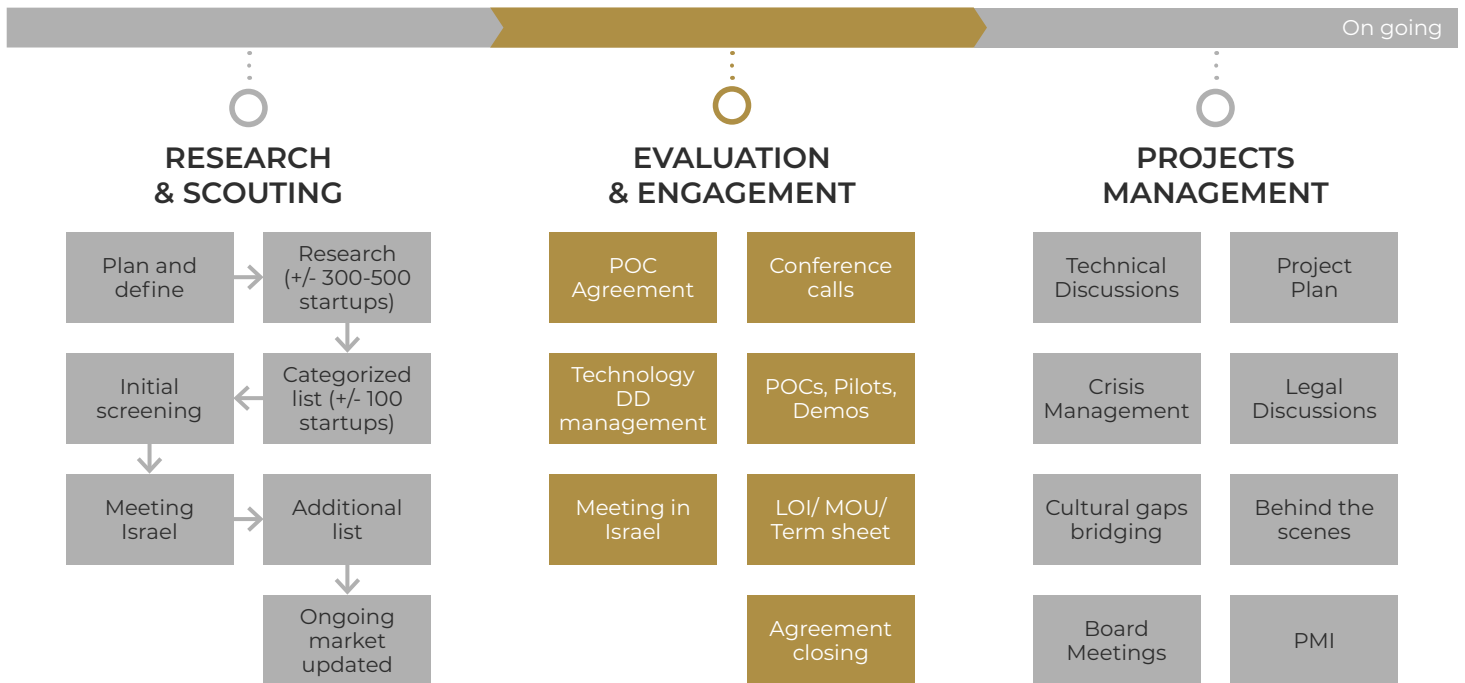

## TECH SCOUTING

- NGLi's TechScouting program offers a customized service that gradually helps to discover Israeli innovation, focused on creating new business from new technologies.
- The TechScouting methodology is based on detailed, mutual / technical communication and on close escorting by the technical staff of NGLi, in the Japanese language.
- The process includes detailed research and selection of relevant solutions, technology testing through POCs and joint R & D projects.  
At the end of the process, decisions will be made to launch a new product, establish a new line of business or to invest in the technology that has been examined.
