

Arugot Organic Care Israel

Arugot
Organic wellness

About Us

Arugot is a boutique family brand for organic skin care and a home of inspiration for beauty and health.

Our products are made from seeds and plants that are mostly grown in the western Negev, on the border between desert and prosperity. The plants in our herb farm obtain the power and concentration from the desert combined with the prosperity of the land of Israel. Using mostly fruits from the Seven Species traditionally native to this land as well as flower extracts from the Land of Israel, we provide you with advanced cosmetics, full of freshness and vitality.

Arugot develops and manufactures certified organic skin care products, adopting the Cosmos standard of Organic Cosmetics and adhering to the highest organic manufacturing standards. We are leading a change of awareness towards safe, ecologic, and effective cosmetics, that will allow us all to enjoy the benefits of true beauty.

Without using traditional preservatives, SLS, silicones, and other harsh chemicals, Arugot developed advanced organic products that are both safe and efficient.

Our products are manufactured from the highest quality natural organic ingredients along with high quality GMP (Good Manufacture Production) standard.

Esther Lachman, the founder of this family boutique brand studied herbalism around the world and earned her degree from Reidman College in Jerusalem. Arugot was founded in 2010 and in 2012, Itay Lachman joined the growing company and became the CEO of Arugot.

Our Raw Metirials

The active ingredients of Organic Cosmetics is based on Herbal extracts, seed oil carriers and essential oils

In order to receive the best high quality extracts we founded an Organic Herb educational farm in the western Negev on the boarder between the Israeli desert and the prosperity sea shore land. In the farm we grow most of our Organic herbs and extracts making sure we put in our organic products the best most concentrated active ingredients.
