

Hoopoe Designer House

We are a group of Israeli
artists that creates Judaica
art in metal.
(hoopoe is Israel's national bird)

www.hoopoe.design

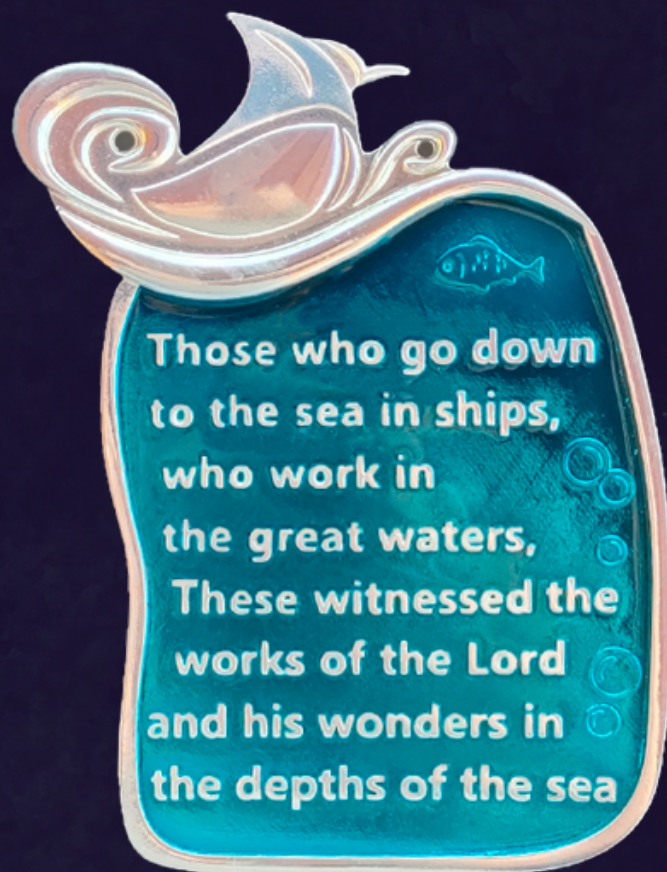

The different models are designed by us in various techniques. The metal casting is done by the leading company in Israel and the rest of the process is done by hand in meticulous work.

We use the best materials: silver plating at the highest purity (99.99%), the best colors, setting of natural gems and Swarovski crystals and of course lots of love and joy.

www.hoopoe.design

We love to diversify. New models go into production all the time (even if they look similar in style ...) and are painted in colors that we mix ourselves in order to create a happy collection of products where everyone can find the special piece that will make him and his loved ones happy

www.hoopoe.design

A lot of our products are unique. When you hold our work in your hand you can be sure that there is no other identical one in the world. That is why we made it - to help make a dear person, who is also unique, happy.
