# EBC

## Energy Bio Care.

### The Biophysical approach

- 10 years of R&D (and counting...)
- Extreme low frequencies easily identified by the body.
- The body decides when and how much to use the frequencies.
- Frequency production is made by an FDA approved device
- A cumulative effect occurs over time.
- Revers-engineering is not possible.

## Multi – System Approach

Each formula (each product) has a wide range of frequencies relevant to several body systems

Not trying to obscure the problem, but to solve the **cause** of the problem

Brain mechanism

Emotional mechanism

hormonal system

nervous system

immune system

## The cumulative effect

After a certain period, it may very well be that you will not need daily use of the frequencies since the unpleasant situation you are dealing with today will be at much lower intense or will not be at all.

The help is not only short-term  
but **also long-term.**

Our goal is to bring the body into a state  
that it succeeds on its own
