

- ✓ **100% natural technology**
- ✓ Tailored to the user's body.
- ✓ No coercion on the body
- ✓ No side effects.

We believe in creating high quality products that help improve the body's natural processes. Products that offer effective solutions in short term and long term preventative, helping according to the different body need's in various periods of life.

## **Technology**

**The EBC (Energy BioCare) technology is based on scientifically proven biophysical approach:**

Every cell and every organ in the human body has a defined frequency.

Using an FDA-approved device, we incorporate frequencies formulas in smart products, which correspond with those that are naturally present in the body.

From the first use, the body recognizes the frequencies' information in the products and uses this information according to its needs.

Just as the body recognizes a skin wound and repairs it until the wound heals (a natural action of the body that is obvious to us) the same

happens when it identifies a problem in the various body systems and works to repair it.

The body uses the frequencies in the product to correct (balance) situations of imbalance and dysfunction created over the time, in order to create normal intercellular communication. This process occurs naturally

We are creating frequencies formulas with a certain purpose that helps the body to improve the natural functioning of its various systems. We apply this knowledge in our products to enhance wellbeing and better longevity.

The offered help is **always multi-system approach**.

Each formula (each dedicated product) has a wide range of frequencies relevant to several systems in the body:

- Brain function
- emotional activities
- hormonal system
- Nervous System
- immune system

The technology allows us to assimilate a very wide range of frequencies into a product. The body will recognize them, and will use only the frequencies it needs.

All systems influence and are influenced by each other and therefore, to help our body, one has to look at the problem broadly, in a multi-systemic way.

This is why our products are able to offer help to a large number of customers of different ages, in different difficulties and many times in cases where the chemical solutions have failed to give the answer, especially when it comes to long-term problems.

### **The cumulative effect:**

When a wound on the skin heals, the skin remains even, right?! It does not return to being injured, there is no regression. The same process happens with MODEANY products. The body manages to rebalance itself and preserves it. This process is not only short-term, but also long-term.

After a certain period, it may very well be that you will not need daily use of MODEANY products since the improvement accumulates; the unpleasant sensations you were dealing with will be at much lower intensity or will not be at all.

When using a MODEANY product, there is no process of coercion on the body. The body gets access to the frequencies information in the product and chooses which to use, depending on its (variable) needs.

MODEANY products do not generate electricity, do not send any electrical pulses to the body and do not perform any coercive or active action on the body.

They contain information of frequencies that corresponds to the same frequencies naturally exist in the body. The whole process of repair&balance is carried out by the body and according to its needs.

**Similar to computer running information contained in a USB device,  
the body is activating the information contained in the product.**

## **Significant differences when compared to chemical drugs or supplements:**

When we swallow a pill (a coercive process on the body), we are forcing the body to deal with ingredients that usually may cause side effects in the short term and especially in the long term.

The **first barrier: digestion.**

People digest in different qualities the same chemical contained in the pill.

The **second barrier: absorption.**

Toxins and metals (many of us carry) in the body, may create a poor absorption and then people are unable to assimilate the required help.

More to say:

most of medications do not provide a "long term" solution to ongoing mental problems such as stress, anxiety and depression, sleep problems, attention problems and the like. These disturbances are then manifested physically and create a double problem that is deeper and more difficult to solve. The common medication usually obscures the problem, maybe alleviate for short term but do not bring comprehensive solution. After several months or years of use, the problem is still there, the body is constantly dealing with it (even if it is below the surface) and worse, the body wears out over time and having difficulty dealing with the problem that still exists.

**When using a MODEANY product**, there is no coercive process. The body recognizes the natural frequencies' information in the product and chooses which frequencies to use, depending on its (variable) needs.

In addition, there are no organ barriers of any kind, since it is a frequency, it is not a substance, and nothing should be digested or absorbed into tissues or organs. The body uses the relevant frequencies through its communication channels directly to the relevant organ that requires assistance.

The effect of using MODEANY products, as it turned out in various studies we have conducted, occurs without any feeling and awareness. At the subtle level of the void in the cell, the change spreads and gradually accumulates without us feeling it at all. When the effect reaches phase beyond the equilibrium point, the body becomes stronger and the feelings of rebalance begin. The process intensifies into a natural homeostasis.

**MODEANY products are not active  
they are attractive.**
