Dear Colleagues and Friends,

Amidst ongoing challenges, Israel remains resolute in our commitment to water stewardship and innovation.

WATEC Israel, our flagship event dedicated to responsible planning, management, and protection of water resources, will take place in Jerusalem from September 16-19, 2024. It will bring together experts, innovators, and thought leaders from around the world to tackle pressing water-related issues.

WATEC partnerships have led to international achievements in water technology, conservation, and sustainability, setting global standards.

The theme of WATEC Israel 2024, "Nurturing Resilience, Fostering Innovation in Water Management," reflects the dynamism of the water industry. This edition also underscores the importance of reliable water access, affordability, and infrastructure investments for a brighter future.

We invite you to join us at WATEC Israel 2024, where like-minded individuals and organizations will address pressing challenges such as water scarcity, climate change, and sustainability.

This year, we will hold cross-sectional discussions on water in nature, agriculture, desalination, municipal, and industrial sectors, encompassing management/policy, innovation, finance, and digital aspects across the board.

With the support of the Ministry of Economy, Foreign Trade Commission, Ministry of Foreign Affairs, Manufacturers' Association of Israel, Israel Export Institute, The Jerusalem Development Authority, Water Edge, and Dead Sea Guardians, KIC - **WATEC Israel 2024** offers the perfect opportunity to hear and meet a range of leading and emerging water companies seeking partnerships, investments, and professional services.

We are looking forward to welcoming you to the beautiful and vibrant city of Jerusalem, where we will celebrate resilience, showcase the industry's strengths, and chart a course towards a more water-secure world.

Oded Distel
CEO, Tal-Ya Agriculture Solutions

Ravid Levy
Senior Director, WaterEdge.il

WATEC Israel 2024 Co-Chairpersons

Shared Resilience and Innovation Globally

WATEC Israel Topics

Agriculture ● Municipality and Industry ●
Digitization ● Management

- Potable vs. agriculture water reuse
- Decarbonization of water and wastewater systems
