INTERNATIONAL DENTAL SHOW

March 25-29, 2025 | Köln, Germany
Hall 10.1 | E- 076G | F- 079G

Israel's Dental Industry: Crowning Innovation

The dental industry in Israel is a thriving sector, recognized globally for its innovation, advanced technology, and high-quality products.

Israel has become a **hub for dental solutions**, with a strong emphasis on cutting-edge developments in digital dentistry, dental implants, and regenerative solutions. The country's dynamic dental ecosystem is supported by a robust network of startups, established companies, and research institutions, making it a key player in the global dental market.

The sector has seen steady growth in exports, new product innovations, and international acquisitions, solidifying its reputation as a global leader in dental technologies.

The Israeli dental industry spans a wide array of **sub-sectors**, each contributing to the overall growth of the market. **Implantology** leads the way, with numerous companies dedicated to the development of advanced dental implant systems. **Regenerative** solutions and tissue engineering are also rapidly gaining momentum, offering patients minimally invasive and highly effective treatments. **Digital dentistry**, encompassing CAD/CAM systems, 3D printing, and diagnostic tools, has revolutionized the field, offering improved precision and patient outcomes. Other key sub-sectors include **oral hygiene products, dental aesthetics, dental tools and equipment, and infection control solutions**.

The Israeli dental industry is home to over 60 companies, with over 30% of them focusing on implants and regenerative solutions, 20% on digital dentistry, and 10% on aesthetics and oral hygiene.

In the past decade, Israel's dental companies have attracted significant

international interest, with several notable acquisitions taking place. The export of dental products from Israel has experienced substantial **growth**, with **key markets** including the United States, Germany, and Japan. However, this export of the Israeli product in the dental segment is spread worldwide. Israel's dental exports have increased by over 50%, with a notable rise in demand for advanced implant systems and digital solutions. The country's reputation for producing high-quality dental products and fostering cutting-edge research and development has positioned it as a trusted partner for international dental professionals. With the global dental market expected to continue expanding, Israel's dental sector is poised for sustained growth and continued innovation in the years to come.

ISRAEL EXPORT INSTITUTE

Israel Export Institute

A non-for-profit organization, established in 1958 as a joint venture between the government of the State of Israel and the private sector to encourage and promote **Israeli exports and international trade worldwide.**

With over 65 years of experience the Israel Export Institute, in partnership with the Ministry of Economy and Industry, supports Israeli companies with their **international outreach** and creates **business opportunities** around the world. We advance business relationships between Israeli exporters and overseas businesses and organizations.

The Institute is a home for thousands of Israeli companies from all industries. We provide all **export related activities and services** under one roof - training, professional advisory services, data and analytics as well as numerous business opportunities in all sectors around the world.

By providing a wide range of export-oriented services to Israeli companies and complementary services to the international business community, the Institute helps build successful joint ventures, strategic alliances, and trade partnerships. It has worldwide business partners at all levels and proven ability to identify and match suitable potential partners, organize one-on-one business meetings, and is a focal point for contacts with the government as well as with industry.

The Israel Export Institute serves also as the governments' arm for **formal business delegations and national business pavilions** abroad representing the Israel's Innovation and capabilities.

The **IEI's Health & Life Science Sector** is the leader in business matching between more than 1700 Israeli companies in the life science industry and worldwide business partners.

Israel's Health Tech industry includes companies targeting all the fields of medicine and offers a variety of innovative medical solutions and technologies that provide advanced and innovative solutions in today's healthcare challenges.

Ministry of Economy and Industry
Foreign Trade Administration

The Foreign Trade Administration at IDS 2025

The Foreign Trade Administration at the Ministry of Economy and Industry is responsible for managing and directing the international trade policy of the State of Israel.

The Administration's main activities include promoting trade and exports, initiating and maintaining trade agreements, attracting and facilitating foreign investments, and creating strategic cooperation with foreign companies.

Together with the Administration's team in Israel, we operate a network of 54 offices, including 40 Economic and Commercial Missions worldwide, which serve as the operational arm of the Ministry in the global markets.

Israel's Economic and Trade Missions are at the forefront of the Israeli government's efforts to boost our industries in foreign markets. Our network of highly experienced economic representatives provides a wide range of services to Israeli companies and to the international business community.

At IDS 2025 our Economic and Trade Missions around the world will work to connect the international business community with Israel's innovative dental industries, as it has done in previous years with great success.

IVENEER[®]
INJECTABLE MATRIX SYSTEM

Specialties:

Restorative & Esthetics

Category:

Medical Equipment,
Minimally Invasive System

iVeneer is a chairside injection-molding matrix designed for direct composite restorations.

iVeneer is a prefabricated injectable matrix template that streamlines the composite bonding process, delivering consistent and reliable results while minimizing stress for dentists, even without advanced skills. This innovative solution is transforming cosmetic dentistry by using flowable injectable composites to create same-day veneers, offering conservative chairside options with minimal or no tooth preparation, preserving healthy tooth structure. Ultimately, IVENEER cuts down on time, effort, and costs for both dentists and patients, making cosmetic dentistry more accessible and fostering growth in the composite bonding market.
